Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-11 have been examined.

Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 10 (page 3, line 18) not found in figure 1. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: "entity A₂" should be changed to "member A₂".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter

Art Unit: 2132

which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Regarding claim 1, the limitation in clause (g) differs from the limitation in clause (f) of the corresponding claim 1 of the Canadian application 2,277,633, which it claims foreign priority. The difference is that an entity long term public key received from the other entity is used as an input for one entity to compute a common shared key K (in present invention), as opposed to a group short term public key received from the other entity (in '633). The applicant is required to explain the difference in the limitations of the two claims although the same formula is used to calculate the common shared key K in both specifications (see page 5, lines 9-12 of the present invention and page 5, lines 1-3 of the Canadian application). Given the discrepancy, it is not clear what invention is being described.

6. Claims 1-11 are not rejected over prior art.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Aoki (6,530,020) discloses group oriented public key encryption and key management system.

Steiner et al. (CLIQUE : A New Approach to Group Key Agreement) disclose key agreement in a dynamic group setting.

Art Unit: 2132

Menezes et al. (Handbook of Applied Cryptography) disclose key management involving two domains.
